Module 4

Dynamic Pipelines

- Expressions & Interpolation
- Simple Metadata Driven Execution
- Dynamic Content Chains
- Reference Names

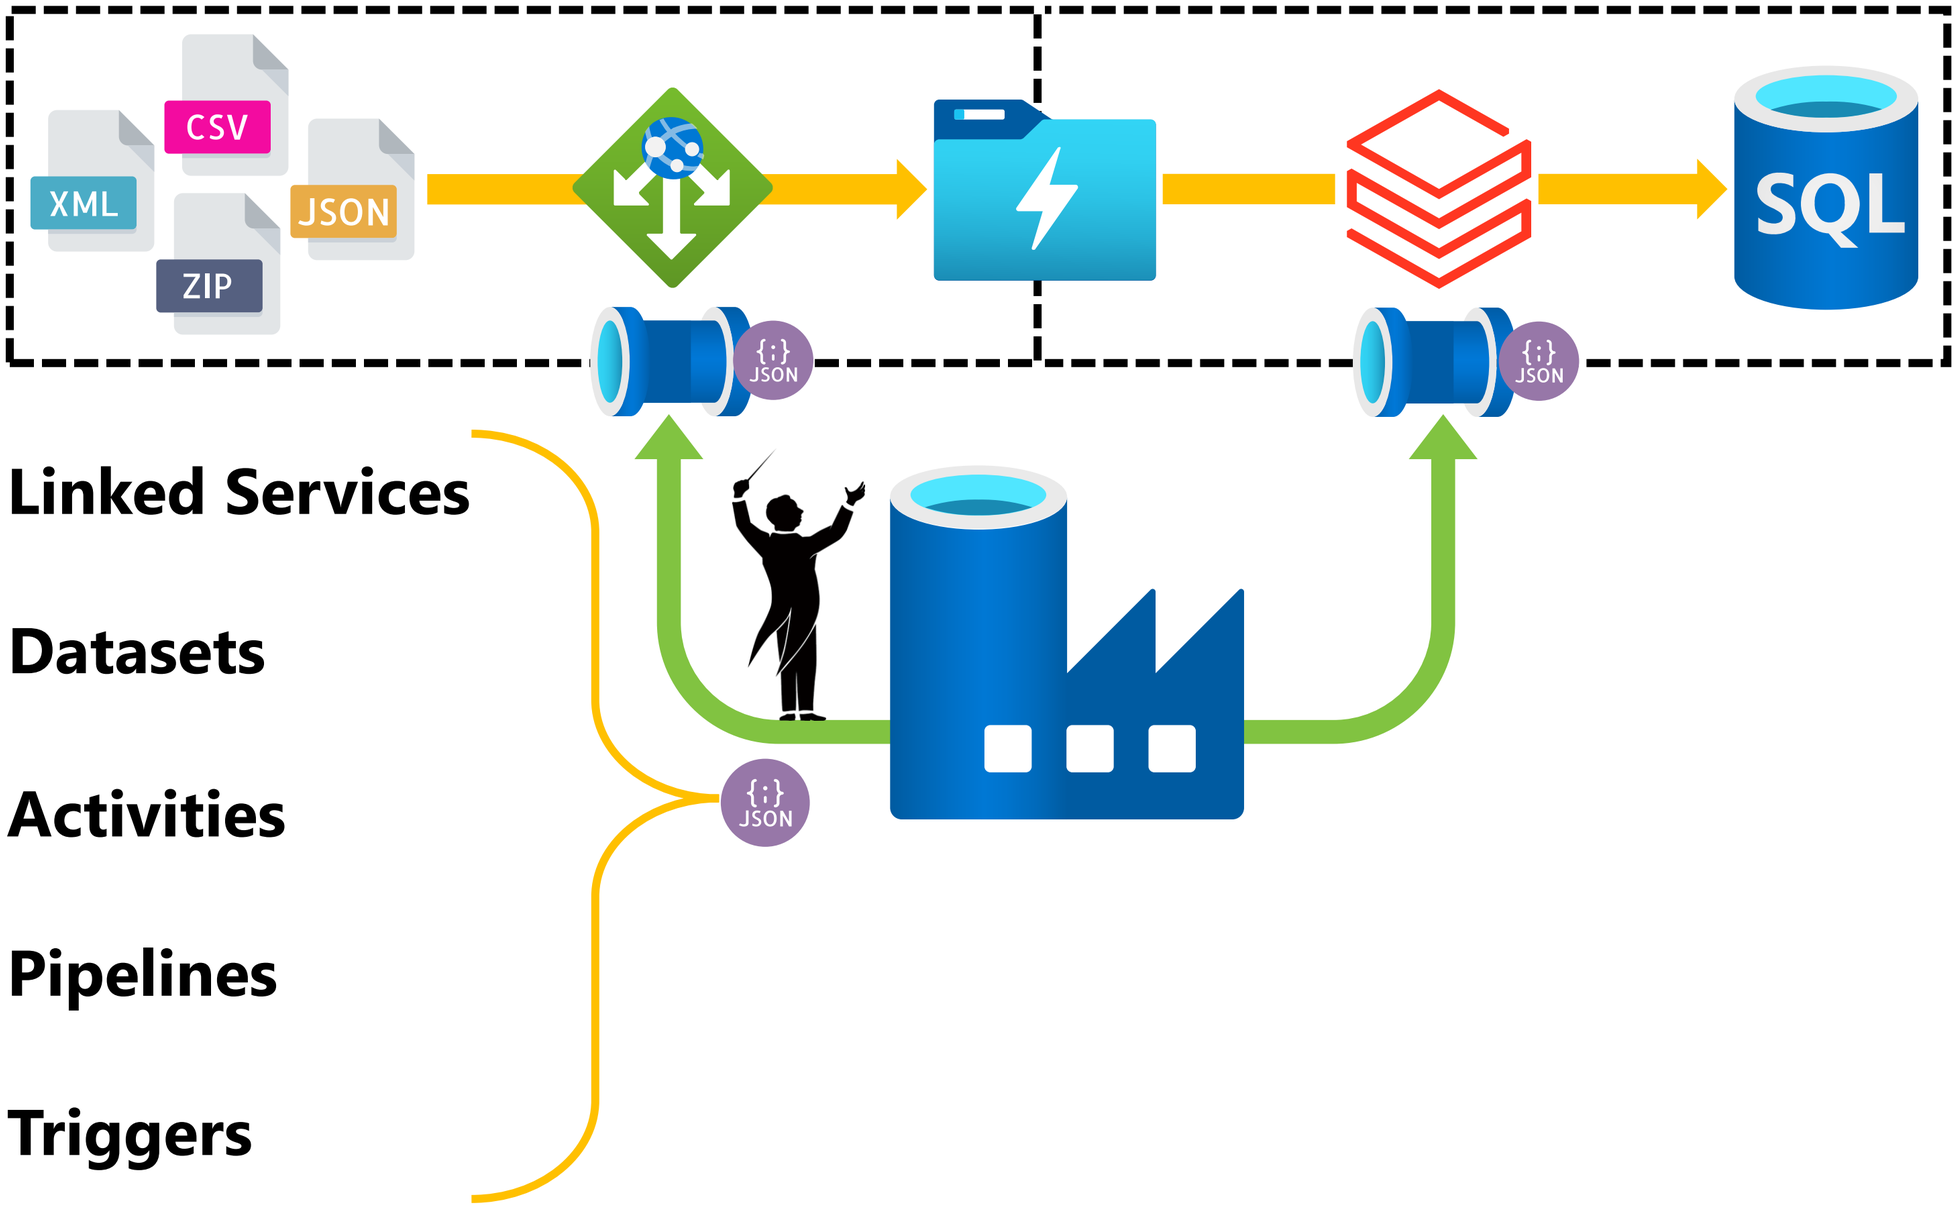
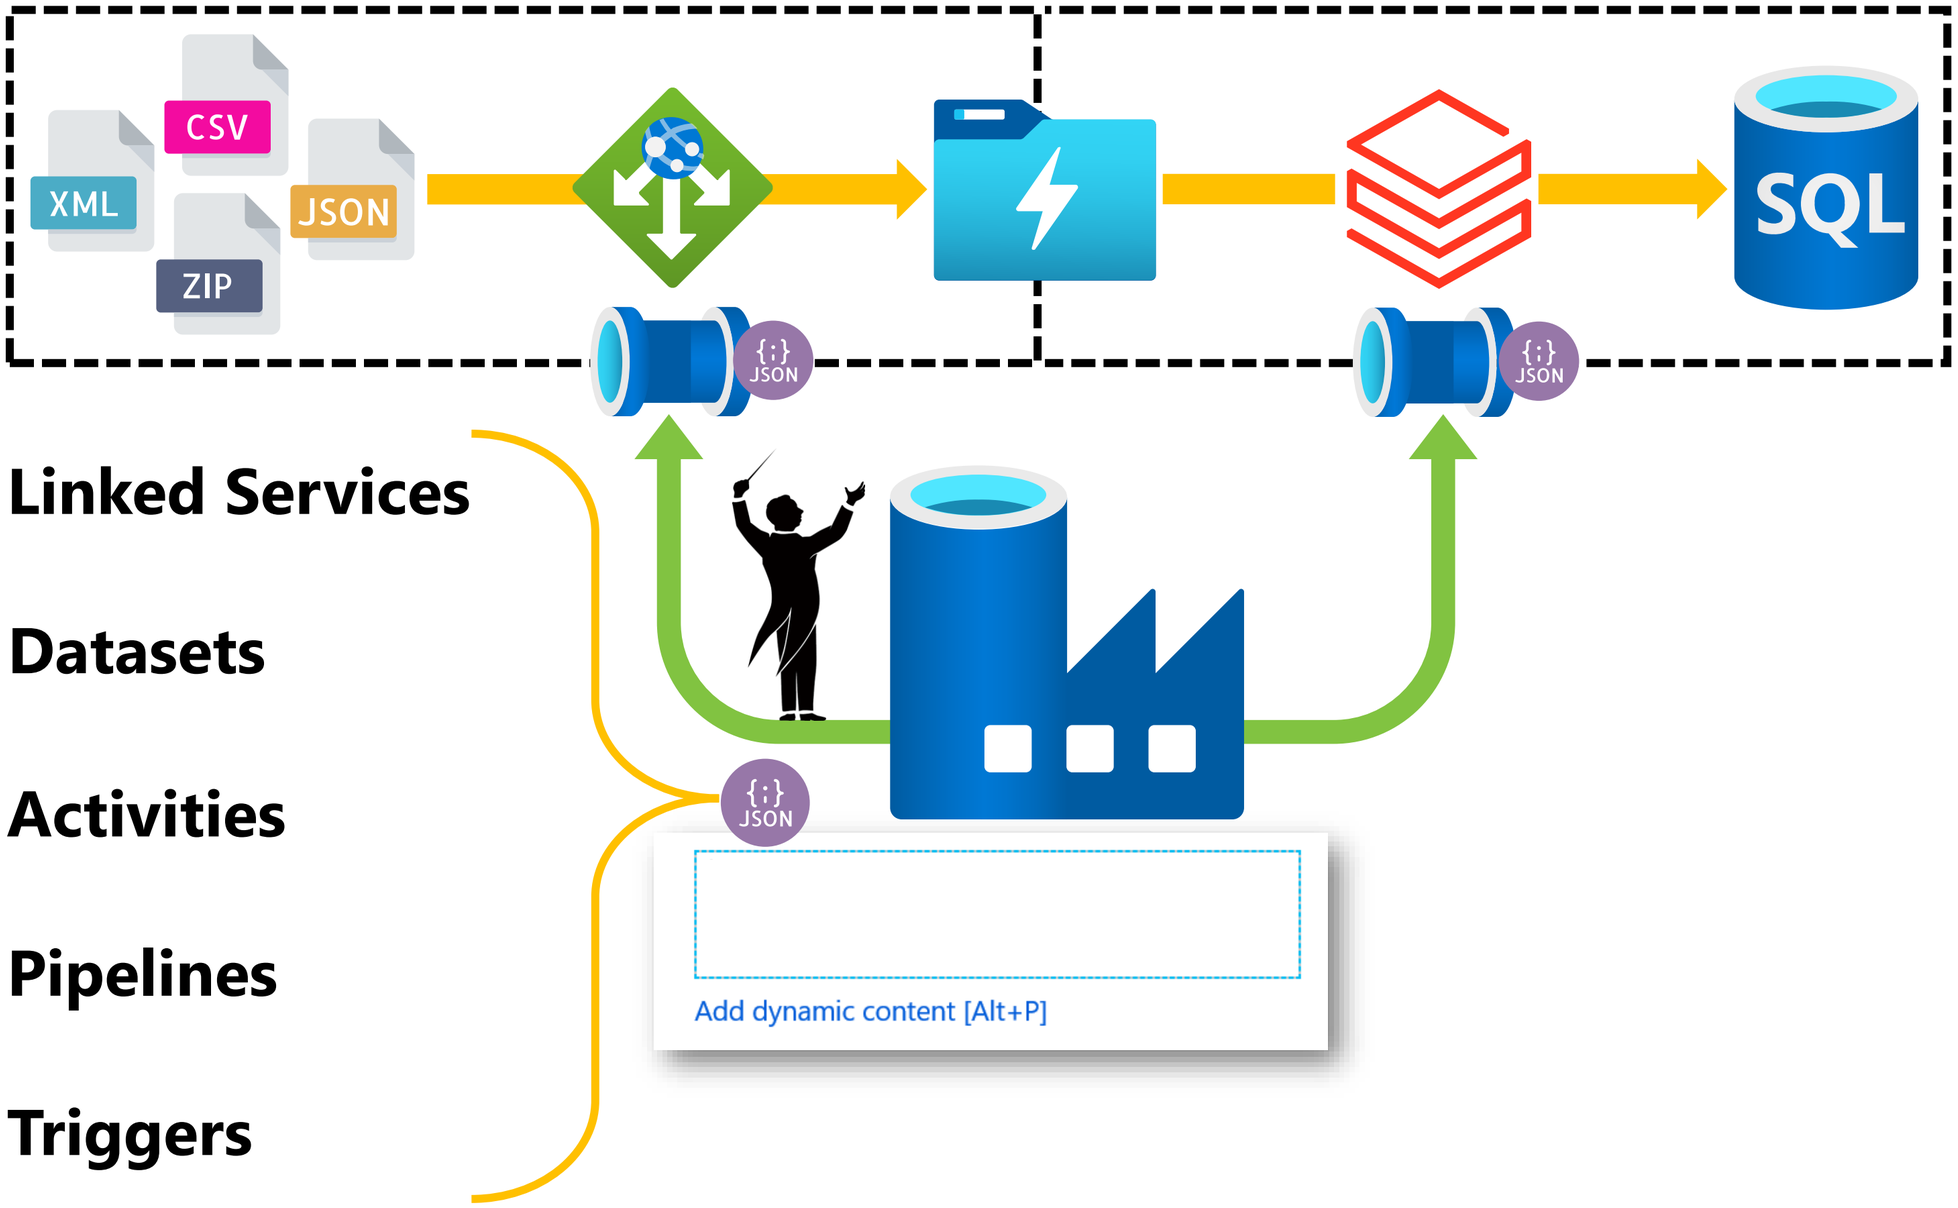
Data Factory Components



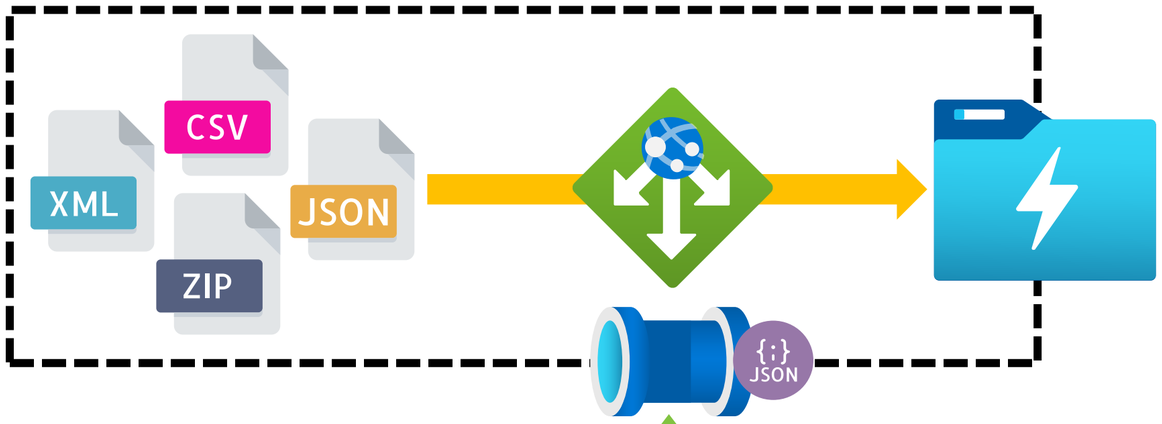
1. **Linked Services**
2. **Datasets**
3. **Activities**
4. **Pipelines**
5. **Triggers**

Data Factory Components – Add Dynamic Content

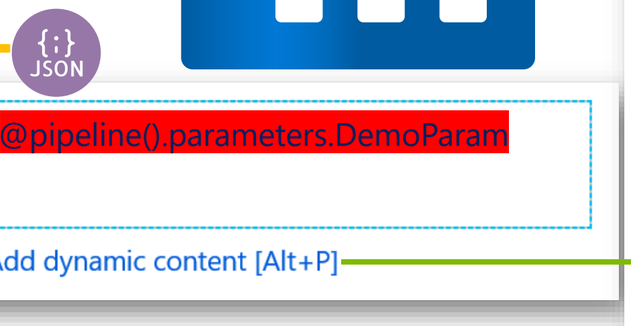


1. **Linked Services**
2. **Datasets**
3. **Activities**
4. **Pipelines**
5. **Triggers**

Control Flow Expressions



1. **Linked Services**
2. **Datasets**
3. **Activities**
4. **Pipelines**
5. **Triggers**



Add dynamic content

@pipeline().parameters.DemoParam

Clear contents

Filter...

Use expressions, functions or refer to system variables.

▲ System variables

Data factory name
Name of the data factory the pipeline run is running within

Pipeline Name
Name of the pipeline

Pipeline run ID
ID of the specific pipeline run

Pipeline trigger ID
ID of the trigger that invokes the pipeline

Pipeline trigger name
Name of the trigger that invokes the pipeline

Pipeline trigger time
Time when the trigger that invoked the pipeline. The trigger time is the actual fired time, not the sch...

Pipeline trigger type
Type of the trigger that invoked the pipeline (Manual, Scheduler)

{
    "name": "LakeFiles",
    "properties": {
        "linkedServiceName": {
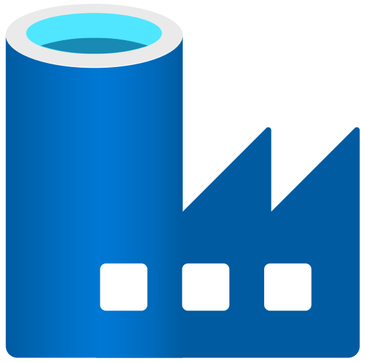
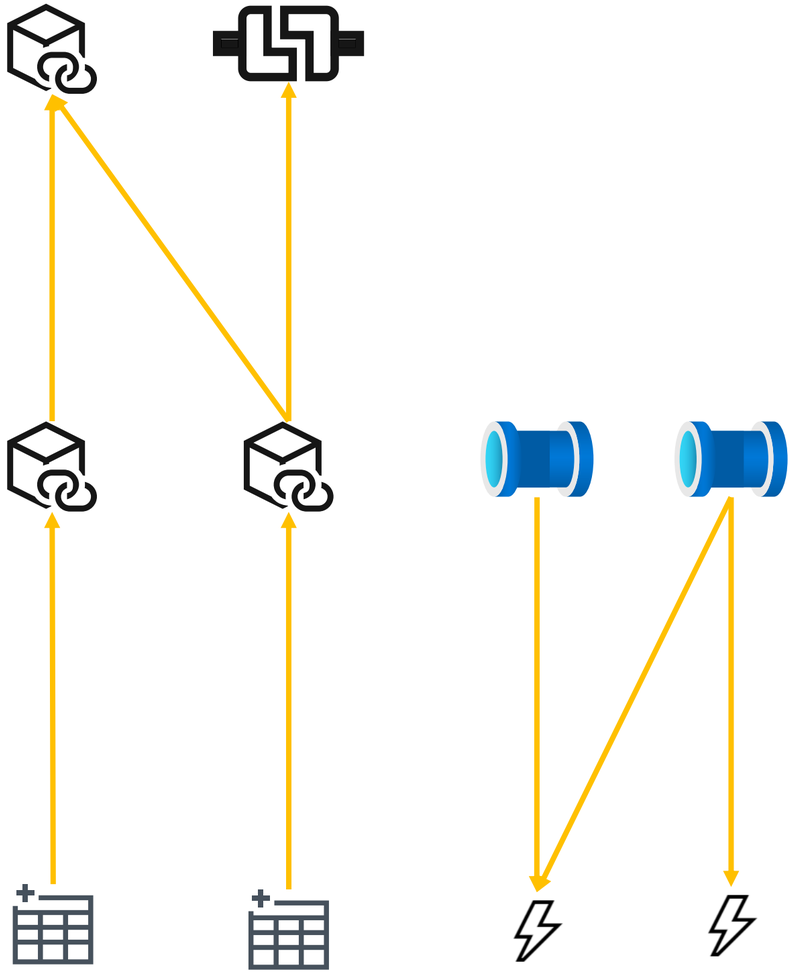
            "referenceName": "trainglake01",
            "type": "LinkedServiceReference"
}}
```

Reference Names



1. Linked Services {:} JSON
2. Datasets {:} JSON
3. Activities {:} JSON
4. Pipelines {:} JSON
5. Triggers {:} JSON



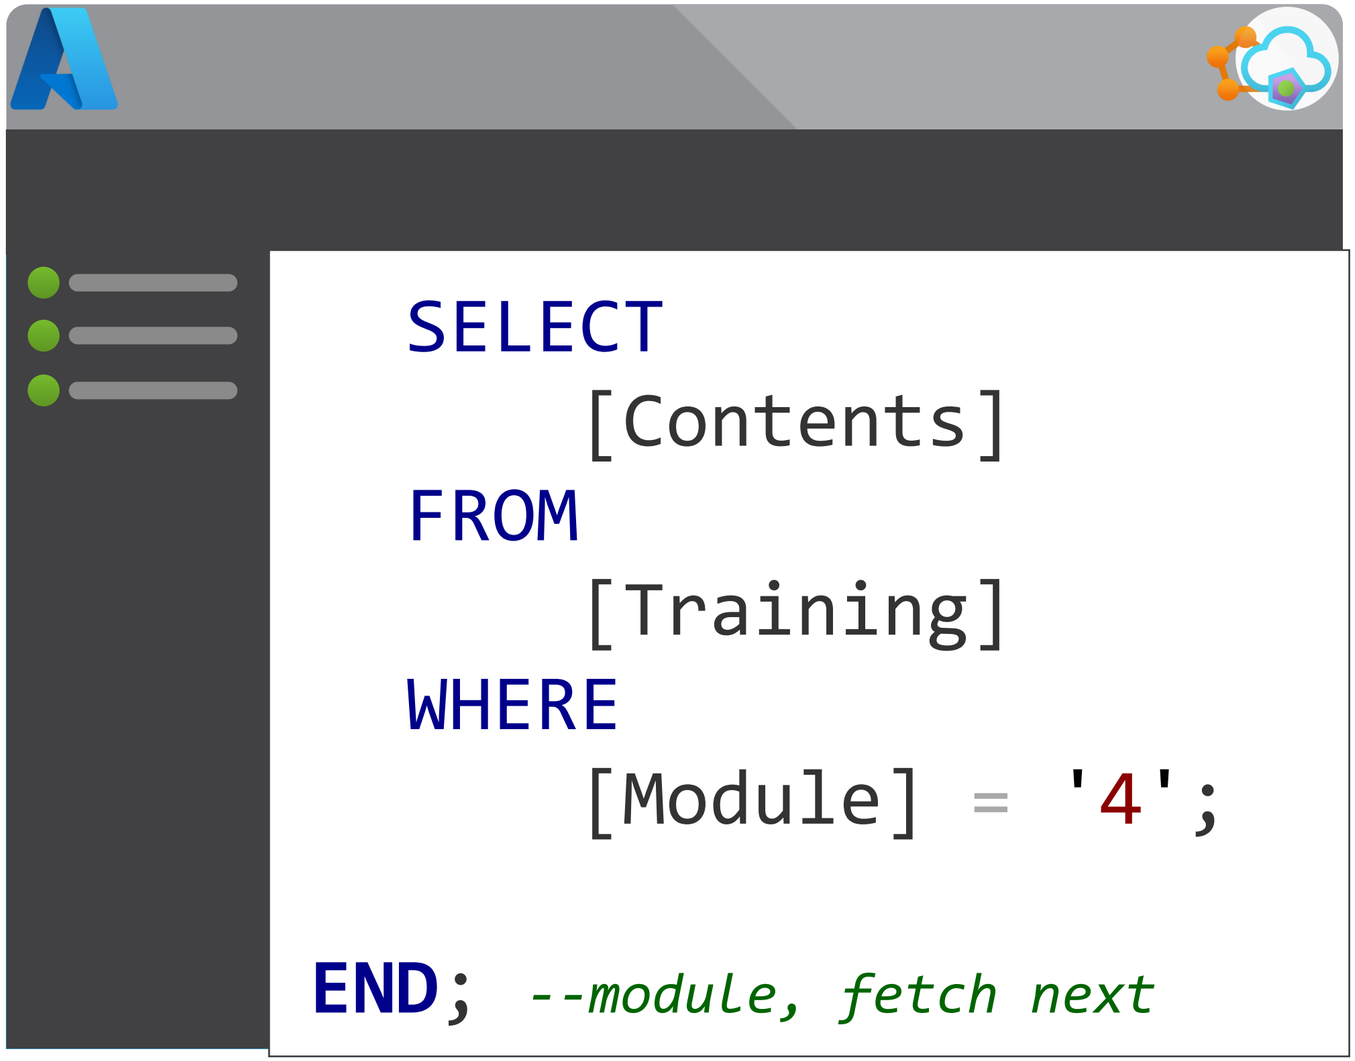
Reference Names **cannot** be dynamic.

- Not at development time.
- Not at runtime.
- At deployment time if <u>being careful</u>.

They are used internally by Data Factory to validate artifact dependencies.

Module 4

Dynamic Pipelines



```
    SELECT
        [Contents]
    FROM
        [Training]
    WHERE
        [Module] = '4';

END; --module, fetch next
```
